## TOOL: Stages of Change

There are different "stages" in the change process and not everyone goes through them at the same time or in the same way. People need time to process what the changes mean to them. The change curve is a normal, predictable process. Everyone goes through it whether the change is personal or business-related; positive or negative; self-imposed or externally imposed.

## Key Tip!

People have a right to be angry when they don't have choices, but they don't have the right to be aggressive to others. Be clear about this.
